

Life changing ideas, game changing support

Supporting and nurturing great science - using knowledge and expertise gained over decades of experience - to inform, elevate and empower new life science innovators and entrepreneurs.

The Babraham Research Campus has been supporting biotech start-ups in Cambridge for over 35 years and running accelerator programmes since 2018.

Our companies have achieved amazing things - raising £72.5m and with a current portfolio value of £139m collectively.

Are you interested in joining our seventh Accelerator cohort in 2025? If you are an early career life science entrepreneur working on a project in therapeutics, reagents, technology platforms or diagnostics, and would benefit from our expertise, lab space and ecosystem, **submit your application today!**

Our focus:

To support the **right project** with the **right innovator** at the **right time**.

We offer:

A distinct programme delivered by experienced practitioners to de-risk projects and drive technical and commercial success.

12 months access to our LiveLabs shared lab space, equipment and state-of-the-art infrastructure across Campus.

Application of a systematic and standardized framework to measure longitudinal success of projects and companies on the programme.

£10,000 non-dilutive funding and in-kind support of <£50k value.

Prime location at the heart of a world-leading campus and the Cambridge ecosystem.

Outstanding peer-to-peer and 1-to-1 mentor support.

A nurturing environment and access to extensive, readily available large and diverse network of serial entrepreneurs, pharma and biotech experts, angel, VC and strategic investors, clinicians, academics and business support organisations.

The 2025 programme will support you to:

- Develop a clear and comprehensive business commercialisation plan.
- Refine and tailor technical milestones to the market space to de-risk the project.
- Execute the commercialisation and scientific/technical plan.
- Increase your network of mentors, investors, and business professionals to progress commercialisation.
- Hone key entrepreneurial skills.
